Z-COMM's Lead Free/RoHS Ordering Procedure

All lead free/ RoHS compliant products are designated by the suffix "-LF" after the standard part number. Ex.: V585ME06-LF.

1. Confirm the status of your VCO or PLL.
    a. Contact an applications engineer at applications@zcomm.com or customer service at sales@zcomm.com to determine if you part number has been converted to lead free / RoHS.
    b. If it has then just order that part number as usual.
2. If your part number is not yet lead free/RoHS compliant.
    a. Let an applications engineer know that you will be placing an order and he or she will generate the new "-LF" part number so that your order can be placed smoothly.
3. Purchase Orders.
    a. Initial POs for lead free/RoHS compliant product must be for 5 pcs with a 6-8 week lead time. This will ensure that Z-COMM engineering will have ample time to redesign the product and procure the lead free/RoHS compliant material.
    b. After the initial 5 pcs the product is treated as a standard product and normal lead-times will apply.
